3rd and 4th graders reading with Kindergarteners.

5th and 6th graders are currently studying the stories of Jesus healing people who were outcasts of society during Biblical times. They also have been writing various types of poetry in English about God’s creations.

Pre-K students will soon be learning about the chicken life cycle. They are incubating eggs that will hatch in about 16 days! Using graphs, comparing, and sequencing skills they will learn how the chicks develop each day. The children are excited to be learning about one of God’s creations and seeing the miracle of life!

Thank you, members of Immanuel Lutheran Church! Through your prayers and financial support, the first three quarters of the school year have been amazing! We enter the last two months of school with many special, fun events, but also so much more learning will be going on!

As a small gift of appreciation, the profits from our Pastry Puffins sales in the amount of \$2,345.50 will be given to the church’s stained-glass window repair fund. The students spend every Wednesday morning in the sanctuary during chapel and appreciate the beautiful windows showing Jesus and his life.

Thank you, again, for all you do for the school and the students!

Mr. R. Arguto
Principal
